

DESCRIPTION

TestDiet® Kaolin Pellets. Offering non-nutritive Kaolin Pellets to laboratory animals provides an effective means of early detection of unwelcome illnesses such as nausea in laboratory animals.

Storage conditions are particularly critical to TestDiet® products, due to the absence of antioxidants or preservative agents. To provide maximum protection against possible changes during storage, store in a dry, cool location. Storage under refrigeration (2° C) is recommended. Maximum shelf life is six months. (If long term studies are involved, storing the diet at -20° C or colder may prolong shelf life.) Be certain to keep in air tight containers.
