

DESCRIPTION

Purina TestDiet® Primate Foraging Bits are formulated especially to provide environmental enrichment to primates and other mammals. The small size and palatability of this diet make it especially suited for foraging. By maintaining a proper balance of nutrients, primates can be allowed to forage without creating a dietary imbalance. This diet can also be used as an additional source of dietary fiber for animals requiring supplemental fiber.

Storage conditions are particularly critical to TestDiet® products, due to the absence of antioxidants or preservative agents. To provide maximum protection against possible changes during storage, store in a dry, cool location.

1. Based on the latest ingredient analysis information. Since nutrient composition of natural ingredients varies, analysis will differ accordingly. Nutrients expressed as percent of ration on an As-Fed basis except where otherwise indicated. Moisture content is assumed to be 10.0% for the purpose of calculations.

2. NDF = approximately cellulose, hemicellulose and lignin.

3. ADF = approximately cellulose and lignin.

4. Energy (kcal/gm) - Sum of decimal fractions of protein, fat and carbohydrate x 4,9,4 kcal/gm respectively.
